# nbn™ Enterprise Ethernet

## → Transform your business with superfast fibre connectivity direct to your door

Sick of missing out on the fast and dependable Internet your business or school needs to compete in a hyper-connected, data-dependent world?

Upgrade to superfast fibre with nbn™ Enterprise Ethernet from Vastnet and close the regional digital divide without the price shock or endless contract term of a legacy private fibre connection from the large telcos.

## → Realise the promise of cloud solutions

nbn™ Enterprise Ethernet from Vastnet delivers symmetrical upload and download speeds from 10 Mbps to 1 Gbps so you can seamlessly operate bandwidth-intensive applications like voice and video, quickly transfer large files, and boost business productivity.

Superfast fibre powers the networking, cloud, and data protection solutions you need to future-proof your business, protect your patients, or give your students access to world class STEM education resources.

## → What's it cost? You'll be surprised!

nbn™ Enterprise Ethernet is a game-changer for organisations struggling with congested Internet using outdated connection technology or faced with limited connectivity options due to their location.
